WORK EXPERIENCE

Engineer

Tata Consultancy Services

08/2019 - Present

Chennai, India

Worked Around

- Responsible for API design and development of RESTful services for the enterprise product in the business using Spring and Spring Boot.
- Worked on the full software development life cycle from gathering requirements to building, testing and maintaining code for a Cloud Adoption Program.
- Worked within an agile team and helped prioritize and scope feature requests to ensure that the biggest impact features were worked on first.
- Efficiently deployed and updated integration/deployment scripts to improve continuous integration practices.

PERSONAL PROJECTS

Supermarket management system

- The project deals with the automation of supermarkets. it includes only the purchase of items and making the system reliable, easier, fast and more informative.

Client management system

- A website deals with the management of client's money using the admin dashboard with CRUD functionality. Used angular as a client-side and firebase as a server-side.
